

NIRO Company Limited is The Gambia's Premiere Private Company providing all-inclusive Airport Ground Handling and Inflight Catering Services. Our mission is to provide best services in the aviation sector while maintaining safety and security requirements to the highest standards. We are looking for interested, qualified and competent candidates to fill the position of:

- 1. Job Title: Senior GSE Mechanic**
- 2. Reports to: GSE Workshop Manager**
- 3. Department: Ground Services**
- 4. Location: Banjul International Airport**

5. Job Purpose

We are seeking an experienced Senior GSE Mechanic responsible for ensuring the reliability, safety, and operational readiness of all Ground Support Equipment (GSE), while providing technical leadership within the workshop.

6. Duties and responsibilities

- (a) Carry out and supervise preventive and corrective maintenance on all Ground Support Equipment.
- (b) Ensure all equipment is inspected and serviceable prior to and after operations.
- (c) Diagnose and repair faults related to diesel and petrol engines and hydraulic systems.
- (d) Lead and guide a team of mechanics and technicians, ensuring tasks are completed efficiently and safely.
- (e) Ensure compliance with company procedures, safety standards, and regulatory requirements.
- (f) Monitor equipment performance and implement improvements to enhance reliability and availability.
- (g) Ensure proper use, handling, and parking of all equipment in designated areas.
- (h) Conduct regular team briefings and support continuous improvement initiatives.
- (i) Report and escalate all safety hazards, incidents, and security concerns in line with company procedures.
- (j) Maintain accurate maintenance records, inspection logs, and documentation.
- (k) Monitor spare parts usage and support cost control within the workshop.
- (l) Perform any other duties as assigned by management.

7. Qualifications Experience

- (a) Minimum of 10 years' experience in Ground Support Equipment (GSE) maintenance, or Heavy-duty vehicles such as trucks, or buses.
- (b) Strong expertise in Engine diagnostics and repair and Hydraulic systems
- (c) Diploma or Certificate in Mechanical/Automotive Engineering or equivalent
- (d) Previous experience in an airport or aviation environment is an advantage

- (e) Proven ability to lead and supervise a technical team

8. Skills and Competencies

- (a) Strong troubleshooting and diagnostic skills
- (b) Ability to work under pressure in a fast-paced operational environment
- (c) High level of safety awareness and compliance
- (d) Good communication and team leadership skills
- (e) Ability to plan and prioritize maintenance activities
- (f) Basic knowledge of electrical systems and troubleshooting (added advantage)
- (g) Valid driving license
- (h) Experience working in hot and demanding environments

9. How to apply:

- (a) An application letter addressed to the Administration Manager
- (b) Recent Curriculum Vitae
- (c) A photocopy of Gambian identification card, and academic documents.

The deadline for submitting application documents is **June 30, 2026**. Please send your application documents in one scanned PDF document on recruitment@niro.gm
